Pricing

This section includes the net market value of the securities in your account on a settlement date basis, including short positions, at the close of the statement period. The market prices, unless otherwise noted, have been obtained from independent vendor services, which we believe to be reliable. Market prices do not constitute a bid or an offer, and may differ from the actual sale price. Securities for which a price is not available are marked "N/A" and are omitted from the Total.

THE AS OF PRICE DATE ONLY APPEARS WHEN THE PRICE DATE DOES NOT EQUAL THE STATEMENT DATE.

Estimated Annual Figures

The estimated annual income (EAI) and estimated annual yield (EAY) figures are estimates and for informational purposes only. These figures are not considered to be a forecast or guarantee of future results. These figures are computed using information from providers believed to be reliable; however, no assurance can be made as to the accuracy. Since interest and dividend rates are subject to change at any time, and may be affected by current and future economic, political, and business conditions, they should not be relied on for making investment, trading, or tax decisions. These figures assume that the position quantities, interest and dividend rates, and prices remain constant. A capital gain or return of principal may be included in the figures for certain securities, thereby overstating them. Refer to www.pershing.com/business_continuity.html for specific details as to formulas used to calculate the figures. Accrued interest represents interest earned but not yet received.

Foreign Currency Transactions

Pershing may execute foreign currency transactions as principal for your account. Pershing may automatically convert foreign currency to or from U.S. dollars for dividends and similar corporate action transactions unless you instruct your financial organization otherwise. Pershing's currency conversion rate will not exceed the highest interbank conversion rate identified from customary banking sources on the conversion date or the prior business day, increased by up to 1%, unless a particular rate is required by applicable law. Your financial organization may also increase the currency conversion rate. This conversion rate may differ from rates in effect on the date you executed a transaction, incurred a charge, or received a credit. Transactions converted by agents (such as depositories) will be billed at the rates such agents use.

Proxy Vote

Securities not fully paid for in your margin account may be lent by Pershing to itself or others in accordance with the terms outlined in the Margin Agreement. The right to vote your shares held on margin may be reduced by the amount of shares on loan. The Proxy Voting Instruction Form sent to you may reflect a smaller number of shares entitled to vote than the number of shares in your margin account.

* Noncovered under the cost basis rules as defined below.

Securities acquired before 2011 or in retirement accounts are generally not subject to the new cost basis reporting rules set forth in the Internal Revenue Code of 1986, as amended ("IRC") (incorporating amendments enacted by P.L.110-343, the Emergency Economic Stabilization Act of 2008) and are, therefore, considered "noncovered," under the new cost basis reporting rules, and marked or denoted as such. All other securities in this section are securities which are "covered" under the new cost basis reporting rules. Securities which are "covered" under the new cost basis reporting rules are defined as non-retirement, US taxpayers securities which have been acquired on or after their "applicable date(s)" at which they are subject to the cost basis reporting rules and the adjusted basis will be reported to the IRS on form 1099-B for the applicable tax year in which the security is disposed.

Reporting requirements generally will be phased in over a three-year period, as follows:

- Stock in a corporation acquired on or after January 1, 2011
- Mutual funds and dividend reinvestment plan (DRP) shares acquired on or after January 1, 2012
- Options and any Debt Instruments that provide a simple fixed payment schedule for which a yield to maturity can be easily determined acquired on or after January 1, 2014.

This Schedule may not reflect all cost basis adjustments necessary for tax reporting purposes, especially for noncovered securities. Adjustments to cost basis may have been made for prior income received and subsequently reclassified by the issuer as a return of capital. In addition, corporate action events may require adjustments to your original cost basis. Return of capital information and cost basis information, as it relates to corporate actions, has been obtained from sources we believe to be reliable.

Adjustments to cost basis can be made after year-end, in particular, for return of capital adjustments, but may also include adjustments for corporate action events. Therefore there may be differences in cost basis reflected on your monthly client brokerage statement at year end versus any subsequent reports, including your 1099-B or online displays you may have available to you.

When you report your cost basis on your tax return, it should be verified using all of your own records. In particular, there may be other adjustments which you need to make, but are not required to be made by Pershing as it relates to H.R. 1424. You should consult with your tax advisor in order to properly report your gain or loss for tax purposes. Pershing shall not be responsible for and makes no representations or warranties with respect to the accuracy of any information that you report to the IRS or other taxing authorities, and, accordingly, disclaims any and all liability that may arise with respect to your use and reliance on the information provided herein for such reporting.

¹³ The cost basis of this security has been provided to us by the delivering firm or transferring agent and Pershing makes no representation as to the accuracy of this information.

Please refer to the Your Account Information Section in your brokerage account statement for your account's existing tax-lot disposition method. The disposition method is the method which you have selected to use in the disposal of each tax lot of the securities held in your account. If you do not select a method, your account will be defaulted to First In, First Out (FIFO). Your account's selected tax lot method will be used to determine the cost basis for calculating gain and/or loss, unless another method was selected at the time of the security disposal, and this may be reported on the IRS Form 1099-B.
